Most novels are situated in a place... although some disguise where, or mix two places together.

You can use search star to find more specific places: type in the city, the country or the continent.. The London novel versus the New York novel,; the Prison versus the open road; Exotic versus familiar.

Where possible, we indicate the place of a novel in keywords, and leave it to you to decide if you want the 823 section for the sea, or for mountains.
